

JC Thomson

Profile

I am an efficient and logical person with a high level of determination and passion for my field. I am very adaptable and enjoy being challenged, whether it is with an unknown environment or learning a new skill or concept. I have gained many skills during my studies including, but not limited to rapidly grasping new concepts, adapting to single and/or group work situations, high level problem solving, integrating generative AI into my workflow, and working with tight time constraints.

Freestate
Edenburg, 9908

Education

Bachelor in Information Technology

North West University

2024 - Present

Expected graduation: 2026

High School

Hoërskool Sentraal

2019 - 2023

Primary School

Trompsburg Primêre Skool

2012 - 2018

Skills

Programming Languages

- C#
- Python
- C++
- SQL (Basic)
- Java

Technologies & Tools

- Visual Studio
- Visual Studio Code
- Command Prompt / CLI
- ASP.NET Web Forms
- .NET MAUI
- Generative AI tools

Programming Experience & Projects

Academic Projects

- Simple inventory management system in C++
- ASP.NET web forms calendar and campus selection application
- Various OOP related java programs inc. sorting algorithms
- .NET MAUI note taking mobile application
- Collaborated with a team to develop a prototype of a database integrated management app for soup kitchens

Personal Projects

- Simple crypto price tracker for displaying arbitrage opportunities
- Ran a game server environment with multiple nationwide participants
- Physics simulations with game engines like unity
- Experimented with integrating AI directly into applications

Languages

Afrikaans
English

Soft Skills

- Problem Solving
- Teamwork
- Communication
- Time Management
- Adaptability
- Creativity
- Pattern recognition
- Analytical reasoning
- Independent work

Concepts

Mastered Concepts

- Object-Oriented Programming
- Classes and Objects
- Constructors and Method Overloading
- Encapsulation
- Inheritance
- Polymorphism
- Interfaces and Abstract Classes
- Arrays and Dynamic Collections
- File Handling
- Exception Handling
- Sorting Algorithms
- Searching Algorithms
- Basic Algorithm Analysis
- Debugging and Testing
- Console Application Development

Currently Learning / Improving

- Data Structures (Stacks, Queues, Linked Lists)
- Algorithm Optimization and Complexity
- Design Patterns
- Version Control (Git & GitHub)
- REST APIs
- Database Integration
- Software Architecture
- Clean Code Principles

Academic Subjects

● Highschool

- Afrikaans
- English
- Life Orientation
- Life Sciences
- Physical Sciences
- Maths
- Information Technology

● University

- Introduction to Computers and Programming
- Programming for Engineers I (C++)
- Graphic Interface Programming I
- Programming I
- Programming for Engineers (Visual Basic)
- Graphic Interface Programming II
- Programming II
- Systems Analysis I
- Decision Support Systems I
- Data Structures and Algorithms
- System Analysis and Design II
- Discrete Mathematics
- Databases I
- Artificial Intelligence I

Goals

● Short Term

- To gain as much knowledge and experience as possible
- To build an impressive portfolio of personal/professional projects

● Long Term

- To specialise in a field that I am passionate about
- To settle down in a place that I love and have a job that I enjoy
- To work remotely full time
